

1. Create a backup of your WhatsApp chat history on your Android device, then locate and verify the backup file in your Google Drive or local storage.

2. Simulate accidental photo deletion by moving 3 images from your phone's gallery to the trash, and then restore them using your phone's built-in recovery feature.

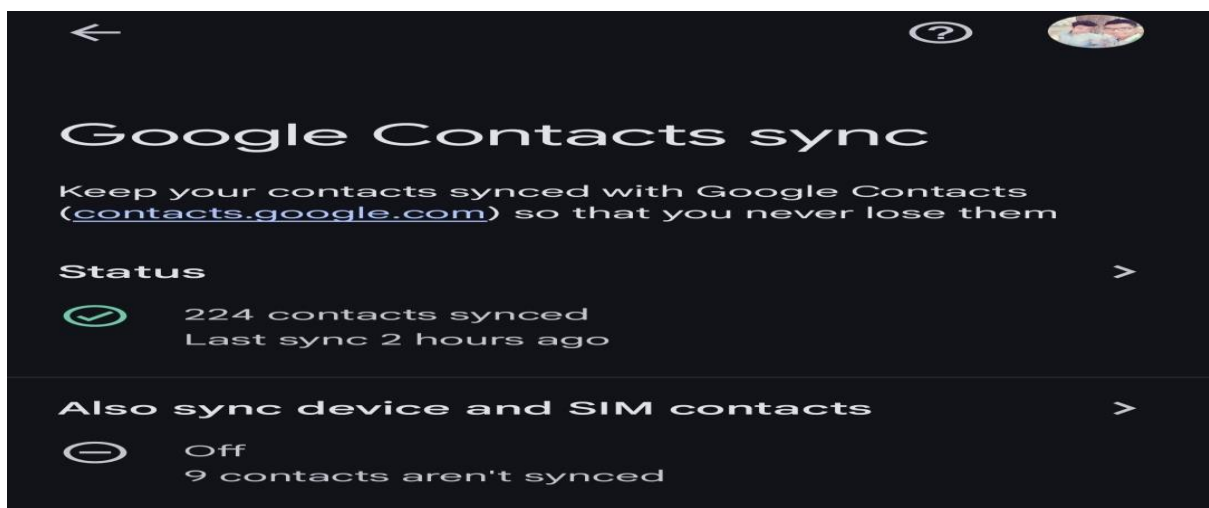

3. **Write a step-by-step guide (with screenshots if possible) on how to schedule automatic backups of your contacts to Google Account or iCloud, so you never lose them if your phone is lost.**

Android Backup contacts to Google account

Step-1 Open settings

- Open Settings on your Android phone.
- Tap Google.
- Tap all services.
- Under Backup & restore, select Google Contacts sync.

Step-2 Turn on contact backup/sync

- Look for: Google Contacts sync/Also sync device and SIM contacts/Sync device and SIM contacts automatically.
- Turn the option ON.
- Then select the Google account where you want your contacts saved. Google allows automatic device/SIM contact saving to one Google account.
- What this does: Phone/SIM contacts/Google contacts/Google account.
- Once saved as Google contacts, they can automatically appear on another Android device when you sign into the same Google Account.

Sync device and SIM contacts

Google Contacts can automatically sync contacts on your device and SIM so that they're backed up to your account and available across Google services and anywhere you sign in. [Learn more about contacts sync.](#)

 Contacts will start syncing soon

Sync device and SIM contacts automatically

Backup account

ROHAN PARMAR

rohanparmar42@gmail.com

Doesn't apply to contacts in accounts syncing with other services.

Step-3 Make sure normal Google contact sync is enabled

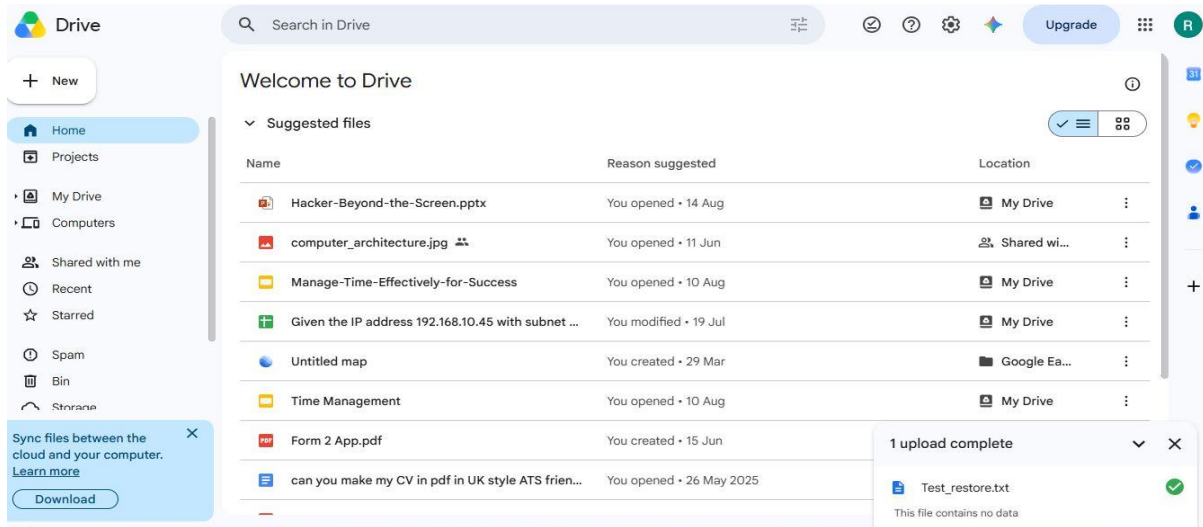

- Go to: Settings/Google/Settings for Google apps/Google Contacts sync/Status.
- Make sure synchronization is enabled. You can also open the Contacts app and pull down on the contacts list to manually synchronize.

Step-4 verify your contacts

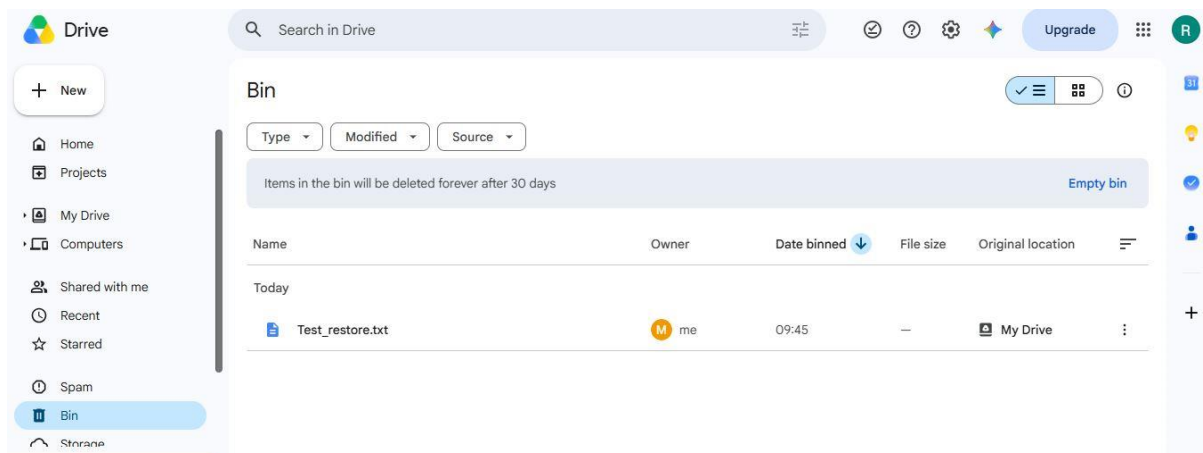

- On a computer, sign into your Google Account and open Google Contacts.
 - If your contacts appear there, they are stored with your Google account rather than only on the phone.
- 4. Use Google Takeout to export and download a backup of your YouTube playlist data, then extract the ZIP and list the names of all playlists you backed up.**
- **All playlists I backed up are:**
 - Latest Gujarati song
 - Please make a WRT300N router connected with three PCs in network diagram in cisco packet tracer
 - OAI TASK2 IND HIN Food 16x9 12s
 - Dil se dil tak
 - Jiya dhadak dhadak

5. Test restoring a deleted file from Google Drive's Trash: upload a sample file, delete it, then recover it from Trash and confirm it's accessible.

Uploaded a sample file
